

## Transport M-Ticketing Applications

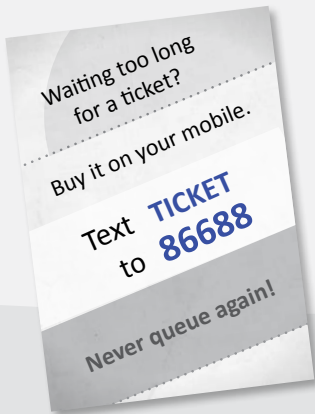

Queuing for a ticket is inconvenient and time consuming for travellers.

Now there is an alternative: download a ticketing app on your phone while you wait in the queue.

Buying a ticket is clear, simple and hassle-free; no log-ins or sign-ups required.

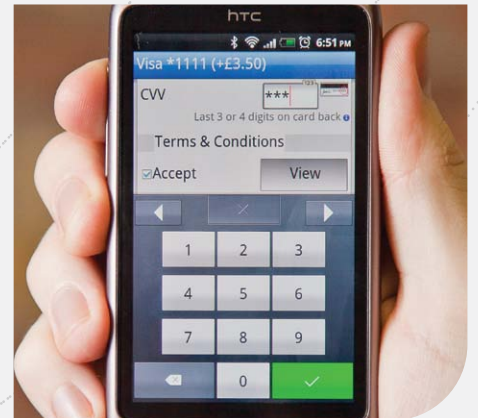

Available on the widest variety of handsets – not just smartphones!

Browse all times and fare options. Rich graphical interface on all phones.

Fully secure payment process. Support for all credit and debit cards.

For repeat purchases, the app remembers your previous journeys and payment details – just re-enter your CVV code.

*"Let me tell you that it's awesome!  
It is a really slick, useful application for UK train travellers. You can check train times as well as buy train tickets, but it goes so much further in making a very smooth and visually appealing interface to interact with."*

– MyNokiaBlog.com

## App store reviews

### Blackberry App World:

*"Possibly the best app on my phone.  
Great design, simple to use."*

*"Check trains and book tickets on the go, and so much easier than doing it through the browser."*

### Android Marketplace:

*"Excellent app, simple,  
efficient and, above all, quick!"*

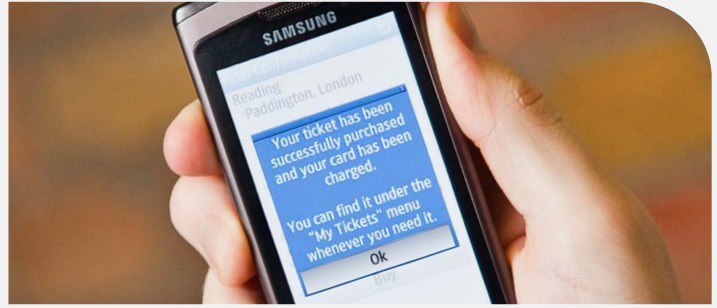

*"Brilliant app! Lets you check times  
and buy tickets with ease!"*

### Nokia Ovi Store:

*"This is how apps should be done.  
It shows we can get iPhone style apps..."*

*"Wow, one of the few high quality apps for Nokia.  
Useful, beautiful, well designed."*

### Supported on:

Download and make your first purchase in minutes - make subsequent purchases in seconds.

Mobile tickets are displayed visually, along with journey details...

...and as a barcode.

Scan your ticket and walk through the ticket gate without breaking step.

Never queue again!
